## EXCAVATOR PALLET FORKS

JCB Attachments are pleased to announce the addition of a new set of pallet forks for both 13 and 20 tonne machines with quick hitch. With an intelligent “dumbbell” style pin design, you are able to change the machine fitment by changing just two pins, no bracket changing required.

- Able to change the machine fitment by changing just two pins, no bracket changing
- Compatible with 65mm and 80mm pin size quick hitches
- Floating forks to enable easy transport in a folded position
- Featured on the rear of the floating forks is a retention plate that fits into a serrated plate on the frame. This acts as an anti-slew lock for the forks, preventing them from moving during
