

**Forestry, Landscaping  
and Drainage Attachments**

## Multi Shovels

- Now available in 32 variants with a range of pick ups
- Suits JCB machines 526-60 to 541-70 & TM320
- Ideal for re-handling soil, manure or timber
- Available with replaceable forged tines or with fabricated grab option
- A level indicator has been added for shovel positioning and efficiency
- The spill guard has been increased in size whilst maintaining excellent operator visibility
- Now available with a weld-on or bolt-on toeplate option
- Hosing is clamped out of the way of debris to reduce the chance of damage

## Grading Buckets

- The perfect tool for bank forming and landscaping
- Available for excavators from 1.5 tonnes to 24 tonnes
- Available as a grading bucket with no holes or a ditching bucket with drainage holes
- Large range of sizes available

## Tapered Ditching Buckets

- Suitable for 6.5 tonne to 11 tonne excavators
- Ideal tool for maintaining ditches and drains
- Enables simple formation of ditches and drains
- Replaceable wear parts extend working life

# Stump Grinders

- Suitable for skid steer machines from 135 to 320T
- 60° swing arc allows operator to cover 1140mm in a single cutting pass
- Requires additional guarding and multi-function controls
- All functions controlled from within the cab with multi-function controls
- Tooth design and pattern allows cutting in both side to side as well as vertical directions

# Forestry Cutting Heads

- Suitable for skid steer machines from 225 to 320T
- Requires additional guarding and multi-function controls
- Extreme-duty design uses a high output variable displacement piston motor to provide maximum productivity
- Easy-to-view gauge allows operator to monitor hydraulic operating pressure
- 2000 rpm drum with 20mm drum wall

# Tillers

- Suitable for skid steer machines from 135 to 320T
- Heavy-duty bi-directional tines till up to 150mm deep
- Dual hitch design allows centre or offset mount for operating next to buildings or other objects
- Heavy gauge front hood acts as a levelling board for tilled soil

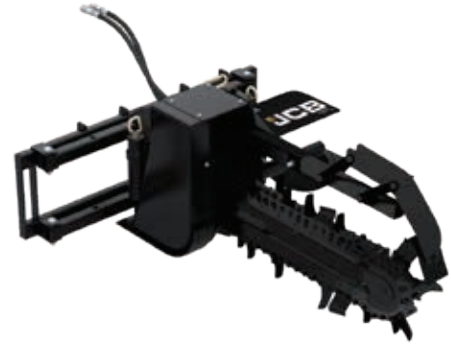

# Tree Spades

- Available for skid steer machines from 150T to 205T and 225T to 320T
- Overlapping blades ensure clean root cutting and support of the root ball
- 25° cutting angle and extended cutting depth produce several uniform root ball sizes with one set of blades
- The wide gate opening allows operator to easily clear trees when engaging
- Pointed, high tensile, abrasion resistant blades for easy soil penetration
- Inside frame design and low profile towers allows operation in confined areas

# Trenchers

- Suitable for skid steer machines from 135 to 320T
- Spring loaded boom to reduce shock loads to the hydraulic motor and carrier
- Replaceable bolt-on wear strips help protect boom in harsh conditions for extended life
- 50mm pitch 22.7t anti-black flex chain gives superior performance and long life
- Replaceable headshaft driven auger for efficient spoiler removal

# Ground Rakes

- Suitable from 5 tonne to 11 tonne excavators
- Used for sorting rocks, twigs and debris in the preparation of topsoil
- Ideal for also clearing roots, hedges and brambles and any other material in readiness for a clean, landscaped finish
- Made using heavy duty 15mm Hardox tines and Brinell HB500 toeplate for durability

# Landscape Power Rakes

- Available with manual angle or hydraulic angle (hydraulic angle requires multi-function controls)
- Suitable for skid steer machines from 135 to 320T
- Purpose designed carbide teeth provide long life and are shaped to ensure best seedbed preparation
- Can angle rake 20° in either direction from centre allowing material to be moved left or right
- Quick and easy to remove end plates to allow the power rake to perform like a box scraper

# Landscape Preparator Rakes

- Suitable for skid steers from 225 to 320T
- Cleans up stones and debris while preparing soil for seeding and planting
- Collection bucket has perforated floor allowing dirt to sift through and provides easy dumping of debris
- Levels out ridges and ruts, removes grass in preparation for re-seeding

# Brush Grapples

- Suitable for skid steer machines from 135 to 320T
- Dual, independent grapples hold irregularly shaped material securely in place
- 1016mm grapple opening allows for large payloads
- Guards protect all ram components from potential damage
- Standard load check valves provide positive clamp force

# Earth Drills and Flights

- Suitable for 1 tonne to 11 tonne excavators
- For accurate and precise drilling of fence and post holes
- Comes complete with hanger bracket and connection hoses
- Standard flights, heavy duty flights and rock duty flights available
- Ideal for the erection of fencing, poles, anchors, road signs and planting trees

# Beaver Powerpacks and Pumps

- Beaver powerpacks offered as either a petrol or diesel option
- Ideal as an extremely portable but powerful hydraulic power pack
- Compatible with 20L trash or sub pumps
- Trash pump is ideal for pumping water with leaves, twigs, sand and sewage
- Submersible pump is ideal for clear water drainage

# Dumpsters

- A compact, walk-behind, high-tip, diesel-powered dumpster
- 2 speed tracking for added precision in tight spaces and a faster speed for travelling across site
- Skip operated hydraulically for unloading with a tip height of 1450mm
- Large load capacity of 500kg with a width of 690mm
- Ideal for landscaping and small scale construction jobs
